*EDUCATION*USA NEWSLETTER

Dear Readers,

Hopefully all of you are finally seeing the end of your term and are ready to start the summer with some fun and educational events!

Budapest Brain Bar

The event series features a diverse offering of presentations, debates and panel discussions, focusing on themes such as the complexity of the relationships between human labor and robotics, mass urbanization and the rural lifestyle or even singularity and religion. The festival's main driving forces are dialogue and group brainstorming. Besides leading experts, decision makers and opinion leaders, the challengers of the status quo - entrepreneurs and students - also take part.

Participants are offered a glimpse at the innovations generating change: cloud-based robotics, gene technology, artificial intelligence and automated transportation, as well as the survival of enterprises in an era of ever-accelerating innovation.

Date: June 4-6, 2015

Venue: Design Terminal, Akvárium Klub
