### **MARYMOUNT UNIVERSITY CELEBRATES 26TH STREET PROJECT FOR THE SCIENCES AND HEALTH SCIENCES**

On October 23, Marymount University in Arlington, Virginia celebrated the grand opening of its 26th Street Project, the most ambitious construction initiative at the University in four decades. The project includes Caruthers Hall, a 52,000 square-foot academic facility focused on the sciences and health sciences; Rose Benté Lee Ostapenko Hall, a 77,000 square-foot residence hall providing apartment-style housing for 239 students; and the Malek Family Plaza, an outdoor gathering space with café seating between the two buildings. The complex is built over four levels of underground parking. The ribbon cutting was held during Family Weekend, so that parents and family members could join their students at the celebration.

Marymount has incorporated sustainable design into this construction project, which participates in the U.S. Green Building Council's Leadership in Energy and Environmental Design (LEED) program. Green features include recycled and local materials used in construction; innovative plumbing fixtures resulting in 21% less water consumption than comparable facilities; and energy-efficient heating, ventilation, and air conditioning (HVAC) systems that use approximately 50% less energy, compared with other similar facilities. For more information about the 26th Street Project or Marymount University, please visit [www.marymount.edu](http://www.marymount.edu)

### **NEW VIDEO ONLINE - NATURALLY OBSESSED: THE MAKING OF A SCIENTIST**

Mixing humor and heartbreak, *Naturally Obsessed: The Making of a Scientist* delves into the lab of charismatic professor Dr. Lawrence Shapiro, and follows three irrepressible graduate students on their determined pursuit of a PhD and scientific success. As if the pressure of scientific discovery isn't enough, the students are also competing in a worldwide race to be the first to publish their findings. Their challenge: to decipher the structure and mechanism of AMPK, a tiny protein that controls the burning and storage of fat. Their road to success: years of trial and error, unflinching dedication, rock-climbing, rumors of pickle juice, and the music of The Flaming Lips.
